TECHNICAL FEATURES

Description

- Load-bearing structure composed of n.1 column with assisted lifting min. height from the ground 76cm, maximum height from the ground 116cm
- Laser cut base 55x50cm
- Nr.1 Shelf in painted steel sheet adjustable in height, suitable for supporting electromedical machines measuring 450x430 mm equipped with front handle, probe holder, and printer holder housing, gel holder
- Four twin wheels Ø 80 mm, the front ones are complete with double action brake
- No. 1 Height-adjustable basket made of plastic material
- Structure entirely painted with epoxy powders in a thermal tunnel at 200°

Base

- Solid sheet metal structure designed to avoid any overturning
- Treatment with epoxy paint finish in thermal tunnel

Wheels

Support	Poliammide
Pirouetting	on a double row of spheres
Band	in black antistatic/conductive and non-marking rubber
Core	Polyamide
Diameter	80 mm
Flow rate	50 kg each, in case of dynamic load.
Front wheels	with double action brake (simultaneous blocking of swiveling and rolling)
Fixing	fixing to the base with a snap-on system

TECHNICAL FEATURES

Uprights

No. 1 central upright fixed firmly to the base of the trolley by screws.
The lifting column is pneumatically adjustable

Accessories included

- Basket: Made of plastic material with special holes for air passage, the basket is adjustable in height according to needs.
- Printer holder housing internal dimensions D.30cm - H.12cm - L.17.5cm
- Front handle that allows easy movement
- 4-position probe holder accessory
- Gel holder

▶ 4-position probe holder accessory

TECHNICAL FEATURES

The trolley is supplied disassembled and complete with:

- Registration with the Ministry of Health (CND)
- CE mark,
- RDM code
- Declaration of conformity,
- Accessories and assembly instructions
